Top Industry Analysts to Lead SCC 2006, Virtual Security Conference

Online Event Delivers Panel of Influential Guest Speakers for Security Planning in 2006

Atlanta, Georgia (January 5, 2006) — eSecureLive, the organizers of Security Challenges 2006 (SCC), announced today the line-up for this year's winter conference, which features keynote address speaker John Pescatore of Gartner and guest speaker Ira Winkler of ISAG, along with a team of other prestigious speakers and sponsors. The free, two-day online conference will be held January 18th and 19th 2006, and will feature in-depth evaluations of today's most critical security topics.

SCC 2006 consists of five segments each day. Attendees may choose to register for all, or parts, of the event based on their organization's specific needs. Day one will address enterprise security, intrusion prevention, email security, virus protection and government security. Day two will cover vulnerability assessment, anti-virus management, phishing, identity management and security challenges.

"Security is a priority for every business in today's marketplace," said Tony Mines, CEO of ShoutStream, Inc., parent company of eSecureLive. "We developed this conference to foster communication between security professionals and technology leaders, and to accurately assess new threats and vulnerabilities facing organizations in 2006."

"SCC 2006 recruited leading industry analysts and professionals to help attendees assess their security weaknesses and leverage new information in order to protect their organizations against growing security threats," said Mines.

The event is expected to draw thousands of attendees from a broad range of industries including government, education and financial services, to learn about the latest in information security. Event sponsors include ActivIdentity, Core Security, eEye, GeoTrust, **iPolicy Networks**, MailFrontier, MCI, NetContinuum, Neoscale Systems, Inc., and Qualys, Inc.

To register for this event, or for more information, visit www.esecurelive.com/scc2006.

About eSecureLive

eSecure Live, a division of ShoutStream Inc., is a leading online resource that provides individuals a unique opportunity to interact with leading experts in the area of Internet Security. eSecureLive offers on-going virtual conferences in addition to press releases, white papers and software demonstrations, as well as several interviews and live panel discussions each month. SCC 2006, a quarterly event, was designed to bring together security experts and technology leaders to discuss current security issues facing IT professionals. www.shoutstream.com.
